

## Appendix I

In computing acreage devoted to rights-of-way, the following figures were used. Those obtained from North Carolina Department of Transportation are identified by an asterisk (\*).

<u>Road Segment</u>	<u>Right-of-Way</u>
I-95*	260 feet
70-A (west of I-95)*	180 feet
70-A (east of I-95)*	60 feet
Pollock Street (widened)	100 feet
Rest of Pollock Street	80 feet
Access roads within Satellite	60 feet
All other roads	50 feet

In classifying housing units, the following general definitions were used:

Standard - A house which has no or only slight defects which could be corrected during regular maintenance. Examples are lack of paint, slight damage to porch or steps.

Deteriorating - A house which has one or more defects that must be corrected if the unit is to continue to provide adequate and safe shelter. Examples are missing roof materials, open cracks, holes.

Dilapidated - A house that does not provide safe and adequate shelter and has one or more critical defects. Examples are a sagging roof or foundation, extensive damage by wind, storm, flood, or fire. Such a unit would cost more to bring up to standard than it is worth and should be destroyed.
